

Hackathon Day 5

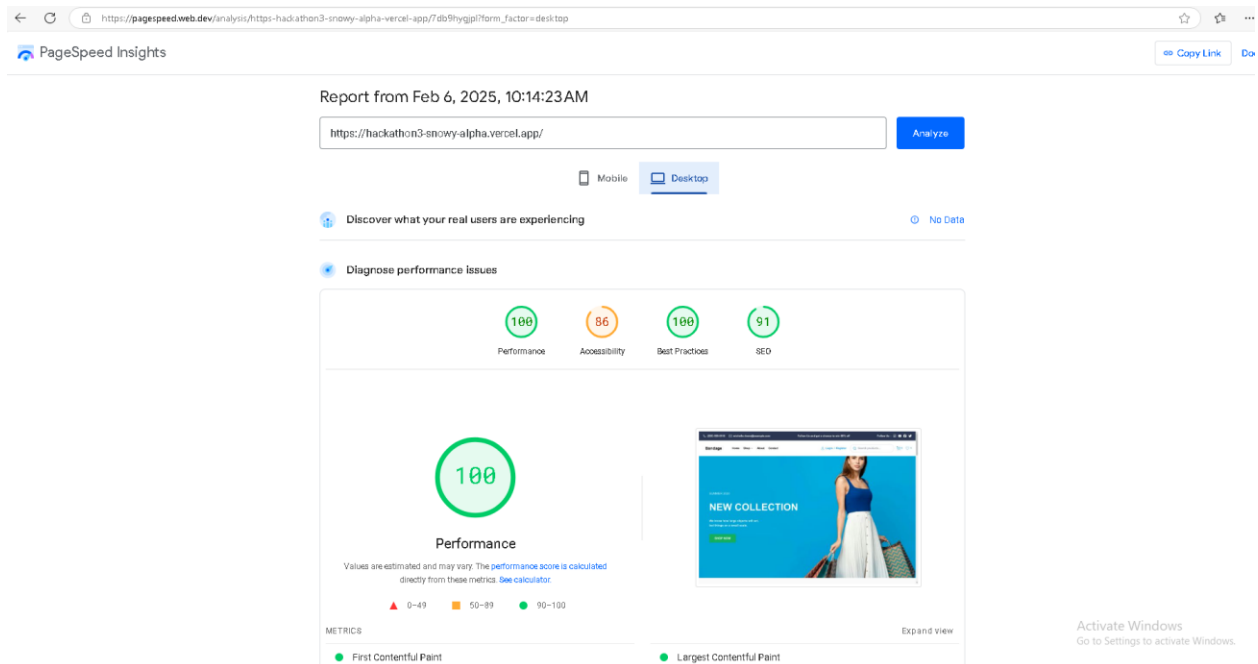

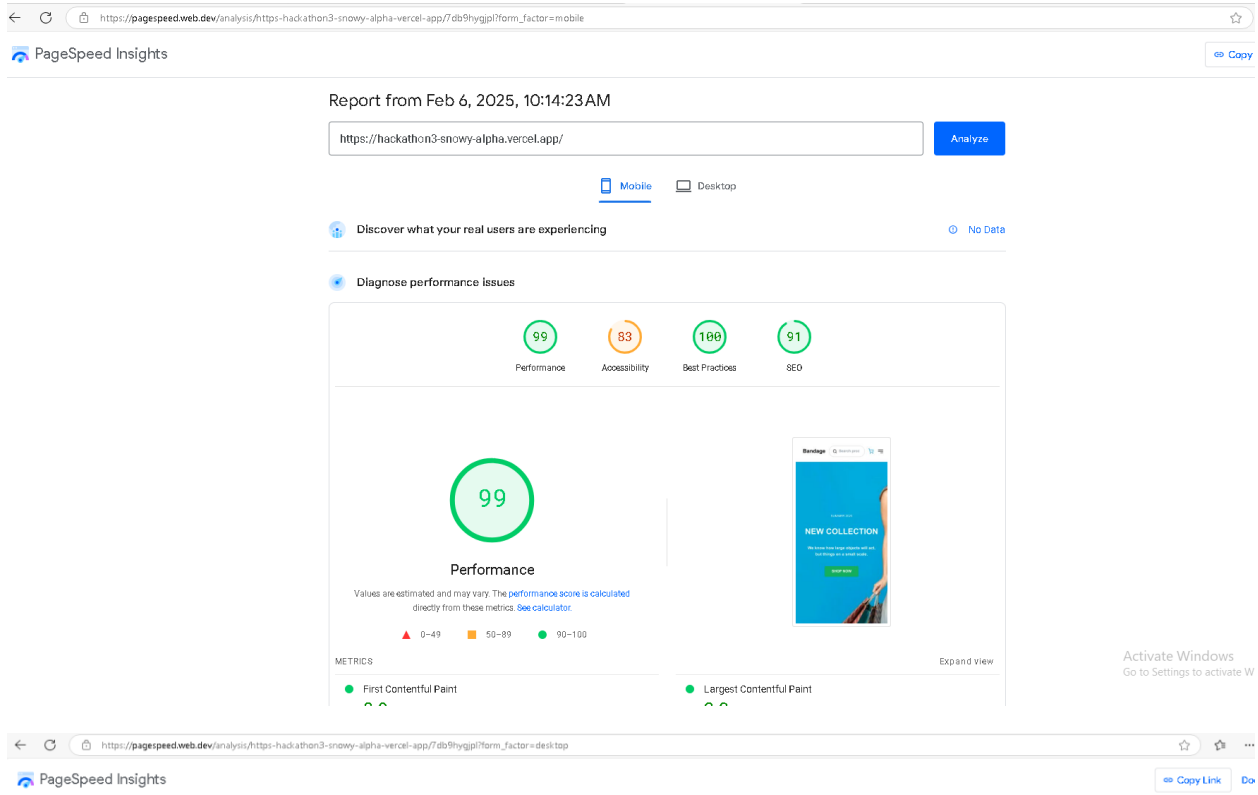

Testing Report

API Working:

Test Case ID	Test Case Description	Test Steps	Expected Result	Actual Result	Status	Severity Level	Assigned To	Remarks	
2	TC001	Validate product listing page	Open product page > Verify products	Products displayed correctly	Products displayed correctly	Passed	Low	-	No issues found
3	TC002	Test API error handling	Disconnect API > Refresh page	Show fallback UI with error message	Error message shown	Passed	Medium	-	Handled gracefully
4	TC003	Check cart functionality	Add product to cart > Verify cart contents	Cart updates with added product	Cart updates as expected	Passed	High	-	Works as expected
5	TC004	Ensure responsiveness on mobile	Resize browser window > Check layout	Layout adjusts properly to screen size	Responsive layout working as intended	Passed	Medium	-	Test successful

A form field element should have an id or name attribute

A form field element has neither an `id` nor a `name` attribute. This might prevent the browser from correctly autofilling the form.

To fix this issue, add a unique `id` or `name` attribute to a form field. This is not strictly needed, but still recommended even if you have an autocomplete attribute on the same element.
